

JULY 14, 1943

6C REGULAR ISSUE

The three values (2c, 6c and 25c) bearing the Girl Planting Rice design were flat-plate typographed and display some striking differences from the other engraved values. Around each sheet in the margin is a frame in the same colour as the stamp, comprising of a series of short parallel lines which appear approximately 4mm from the outermost stamp edge. The frame laps at each of the four corners on all three values. The 2c and 25c values both have upper left and upper right frame line corners which vary in the position the way the frame lines overlap, creating two distinct variations. The 6c does not possess this variety.
